1. Missing Database Driver

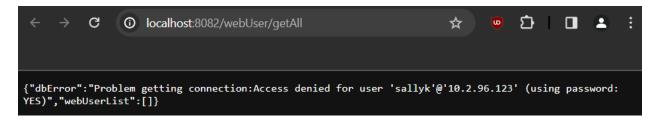

Error caused by a wrong string driver, to fix you can lookup the driver string for sql to get the correct string.

2. Database Unreachable

Error caused by not being tunneled into the server and attempting to access database. This can be fixed by sshing into the server before running the program.

3. Database Not Authorized

Erro caused by wrong credentials, to fix confirm location of database on server and verify the username and password.

4. Syntax error in SQL Statement

Error caused by invalid Keywords used in a SQL statement. It can be fixed by checking the SQL statement and validating the Keywords.

5. Error Extracting Data from Result Set (bad column name)

Attempting to reference an incorrect column name from the database. Confirm table column names in database to rectify issue.

6. Error Extracting Data from Result Set (wrong data type)

```
{"dbError":"", "webUserList":[{"webUserId":"1", "userEmail":"bad Integer in
FormatUtils:sallyk@temple.edu. Error:class java.lang.String cannot be cast to class java.lang.Integer
(java.lang.String and java.lang.Integer are in module java.base of loader
'bootstrap')", "userPassword":"ppp", "userImage":"https://cis-
linux2.temple.edu/~sallyk/_pics/sk_07_17.png", "birthday":"", "membershipFee":"$23.38", "userRoleId":"3",
"userRoleType":"Edit", "errorMsg":""}, {"webUserId":"2", "userEmail":"bad Integer in
FormatUtils:ryan.renolds@action.com. Error:class java.lang.String cannot be cast to class
java.lang.Integer (java.lang.String and java.lang.Integer are in module java.base of loader
'bootstrap')", "userPassword":"ppp", "userImage":"https://upload.wikimedia.org/wikipedia/commons/thumb/1
```

Error caused by incorrect format function when storing table cell value to string data. This can be fixed by confirming the datatype from the database configuration to correctly format obtained objects.
